Key Changes

Mar 2017-June 2017

Categories with >10% growth for Visitors AND Minutes Mar-Jun 2017

Politics (News) and Weather are the only categories which experienced large growth

Weather Category UV increase follows seasonal trends. Jun-Aug are typically highest audience months. The Weather Company, BBC & Accuweather drove the gains

Election contributed to Politics increase. Guardian and BBC both added 3.8 million visitors in the month of June

Unique Visitors to the Politics Category Jan 2015-Jun 2017

The General Election contributed to a 5.5 million increase between May and June

Unique Visitors/Viewers (000) to the Politics Category in the UK

Reach increased by 13% points between May and June 2017. This increase was similar to that of the General Election in May 2015 (+ 15.5% pts) but much lower than the Brexit uplift in June 2016 (+26% pts)

Unique Visitors to Labour & Conservative Websites Jan 2016-Jun 2017

Labour witnessed the bigger increases during the last 2 major votes

Interest in Labour's site commenced earlier and visitor growth was higher in the run up to the 2017 election

Unique Visitors to the top 10 News/Information sites Mar 2017- June 2017

UK News/information sites also witnessed big audience gains

Change in Visitors (000s) Mar 2017- Jun 2017

June was a big UK news month with the General Election, Borough Market terrorist attacks & the Grenfell Fire all dominating headlines

The overall News category didn't increase as the US press e.g. USA Today, Washing Post, CBS News, & NY Times all saw declines

Methodology and Definitions

- This report utilises data from the comScore suite of UKOM approved products, namely comScore MMX, comScore Video Metrix and comScore MMX Multi-Platform, as well as comScore Mobile Metrix which is pending UKOM approval.
- **comScore MMX Multi-Platform®**
comScore MMX Multi-Platform® offers comprehensive reporting on more than 300,000 digital media entities, including their unduplicated audience size, demographic composition, engagement, performance within key user segments and behavioral trends. All of these metrics are measured across multiple digital media platforms, including desktop computers, smartphones and tablets, and content delivery vehicles, including websites, videos and apps. These platforms are unified using both panel- and census-based methods to deliver a holistic view of media companies' total digital populations. *For more information, please visit: <http://www.comscore.com/Products/Audience-Analytics/Media-Metrix-Multi-Platform>*
- **comScore MMX®** The comScore MMX® suite of syndicated products sets the standard for digital audience measurement and media planning. It is powered by Unified Digital Measurement™, the measurement approach that bridges panel-based and website server-based metrics to account for browsing on PC. MMX delivers the accurate suite of audience metrics, providing valuable demographic measures, such as age, gender, household income and household size. MMX reports on more than 35,000 UK properties. *For more information please visit: http://www.comscore.com/Products/Audience_Analytics/MMX*
- **comScore Mobile Metrix®**
comScore Mobile Metrix® captures total mobile audience behaviour on browsers and apps across smartphones and tablets. With Mobile Metrix, publishers can demonstrate the value of their mobile audiences, while agencies and advertisers can strategically plan and buy digital advertising on mobile platforms to achieve their campaign objectives. *For more information, please visit: www.comscore.com/Products/Audience-Analytics/Mobile-Metrix2*
- **comScore Video Metrix®**
comScore Video Metrix® provides transparent, end-to-end video measurement and uses robust duration measurement to reveal engaged time spent viewing online video, along with the unique ability to Separate advertising and content. *For more information, please visit: http://www.comscore.com/Products/Audience_Analytics/Video_Metrix*

About comScore

comScore, Inc. (NASDAQ: SCOR) is a global leader in digital measurement and analytics, delivering insights on web, mobile and TV consumer behaviour that enable clients to maximise the value of their digital investments.

A preferred source of digital audience measurement, comScore offers a variety of on-demand software and custom services within its four analytics pillars: Audience Analytics, Advertising Analytics and Digital Business Analytics. By leveraging a world-class technology infrastructure, the comScore Census Network™ (CCN) captures trillions of digital interactions a month to power big data analytics on a global scale for its more than 2,000 clients, which include leading companies such as AOL, Baidu, BBC, Best Buy, Carat, Deutsche Bank, ESPN, France Telecom, Financial Times, Fox, LinkedIn, Microsoft, MediaCorp, Nestle, Starcom, Terra Networks, Universal McCann, Verizon, ViaMichelin and Yahoo!.

About UKOM

UKOM's objective is to set and oversee the delivery of a credible industry standard for digital audience measurement. That means quantifying audiences in terms of people, not browsers or machines.

UKOM's governance structure involves all sides of the industry, to ensure that comScore services meet our collective needs fully and fairly.

The whole UK media industry is involved in setting and overseeing UKOM standards through its Technical and Commercial Committees, and the UKOM Board.

UKOM and comScore work to an agreed process for product approval, from agreeing concepts, to approved data publication, and continuous assessment.
